Type: Setting up a Voiceover Studio

Description: Hilo is an excellent solution for voiceover recordings that are typically one or two artists at a time. The easy-to-use interface and flexible monitoring capabilities for monitors and headphones make Hilo the perfect choice for this application.

1. Plug mic into Mic Preamp, set the appropriate level.
2. Mic Preamp analog output to Hilo LINE IN L.
3. USB Connection to computer for DAW recording and playback.
4. Hilo PHONES jack on the front panel for Voiceover Talent
5. Hilo LINE OUT L&R and AES/EBU OUT can be used for analog and digital recording devices, either as primary or back up recorders (in addition to or instead of DAW recording via USB).
6. Hilo MONITOR OUT L&R to powered monitors or power amp/monitor combinations.
